

## Raising Attainment in Maths

Experience a range of fun, stimulating and inspiring activities that will help you to raise attainment in maths in your classroom. We are working with TT Education to offer this outstanding CPD course to schools in Peterborough and nearby areas.

Together, we'll explore how to provide context to learning situations in order to develop children's mathematical language, procedural fluency and conceptual understanding. We will help you to identify the barriers that children face in maths and leave you brimming with engaging, fun activities that will ask future mathematicians to reason, solve problems and move towards mastering key concepts.

*"The course was action packed and full of exciting ideas to use in the classroom. It was extremely engaging and it was good to try out the games for ourselves."*

*Steph Oland, Dorset House School*

*"What a great way to begin the new term, with some great new ideas to help engage my class and inject more fun into my maths lessons!"*

*Sophie Turner, Stonebow Primary School*

### Course objectives / outcomes

- Develop mathematical fluency and reasoning skills in learners.
- Nurture maths problem-solving skills and move children towards mastery.
- Inspire and engage children to become confident mathematicians.
- Discuss how to construct effective learning sequences for your children.
